Having Trouble with Your System?
See pages 15 to 19 of this booklet.
To determine if the issues you're having require a service call, please see page 19.

Please note: there will be a service call fee if the issues are caused by anything other than a manufacturer's defect.

PRO TIP ABOUT CUSTOM PATTERNS AND COLORS:

When you create a custom pattern or color, we highly recommend you take a screenshot of each one and store them in your phone for future reference, just in case you have to do a factory or "hard" reset on your controller.
